## About Me

I am a 19 years old student from Germany.

I found a passion in working with computers.

2016 I started coding in JavaScript. Since then it became a hobby to me.

## Skillset

### Backend

- Java
- Python
- Flask
- NodeJS

### Frontend

- HTML5
- CSS3/SASS
- TypeScript
- React

### Workflow

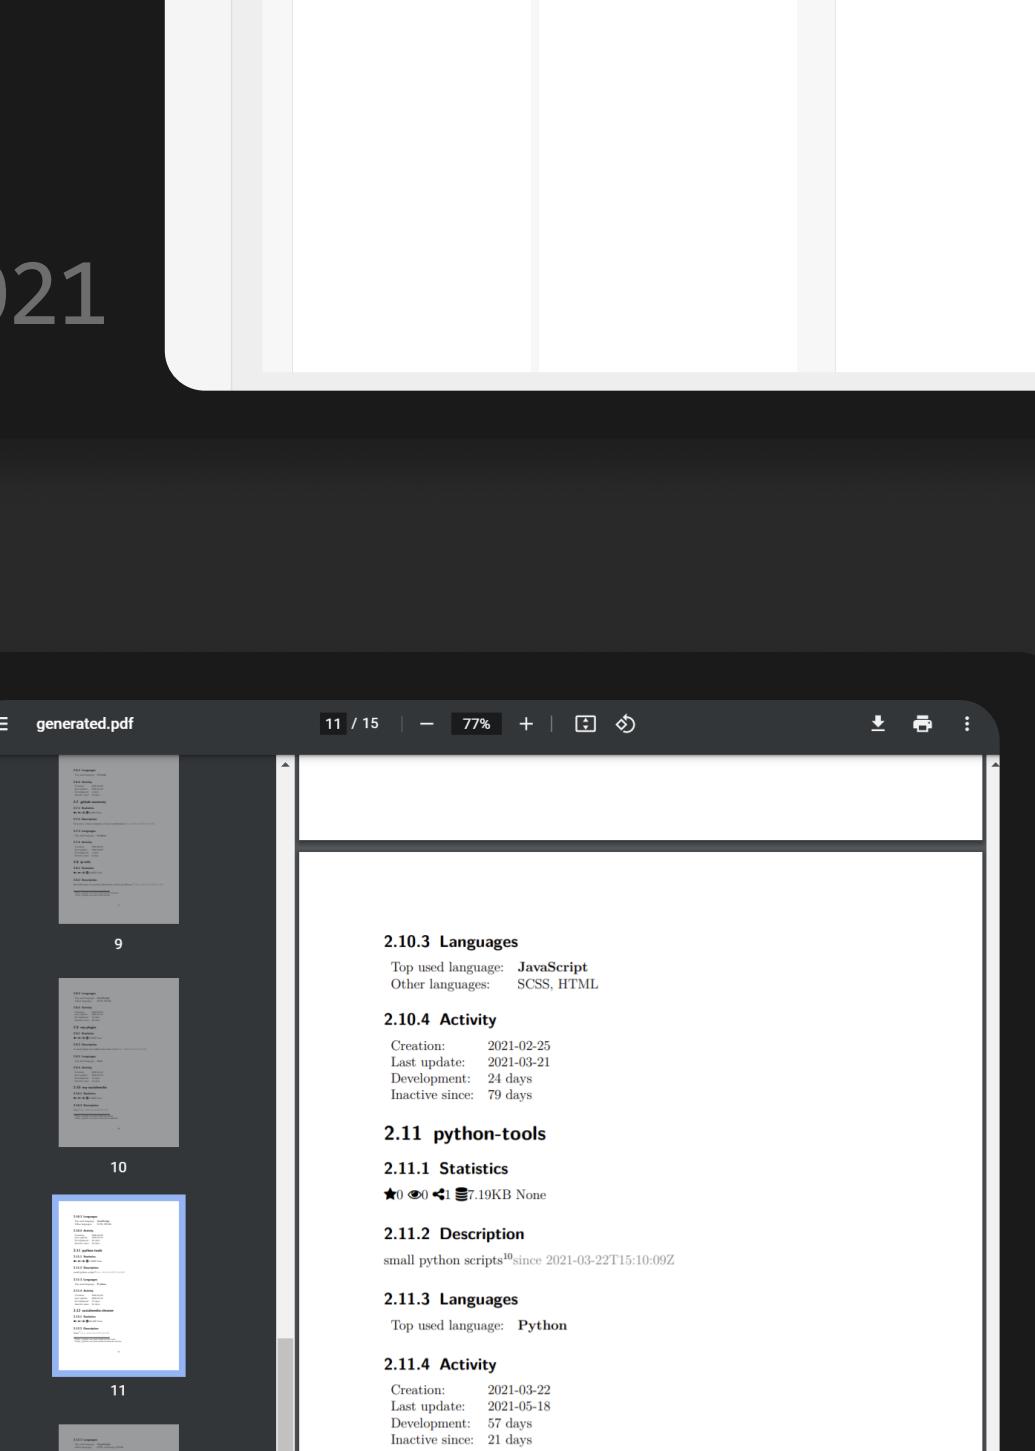

- Scrum
- Jira
- Git

...extending the knowledge everyday!

## Some thoughts...

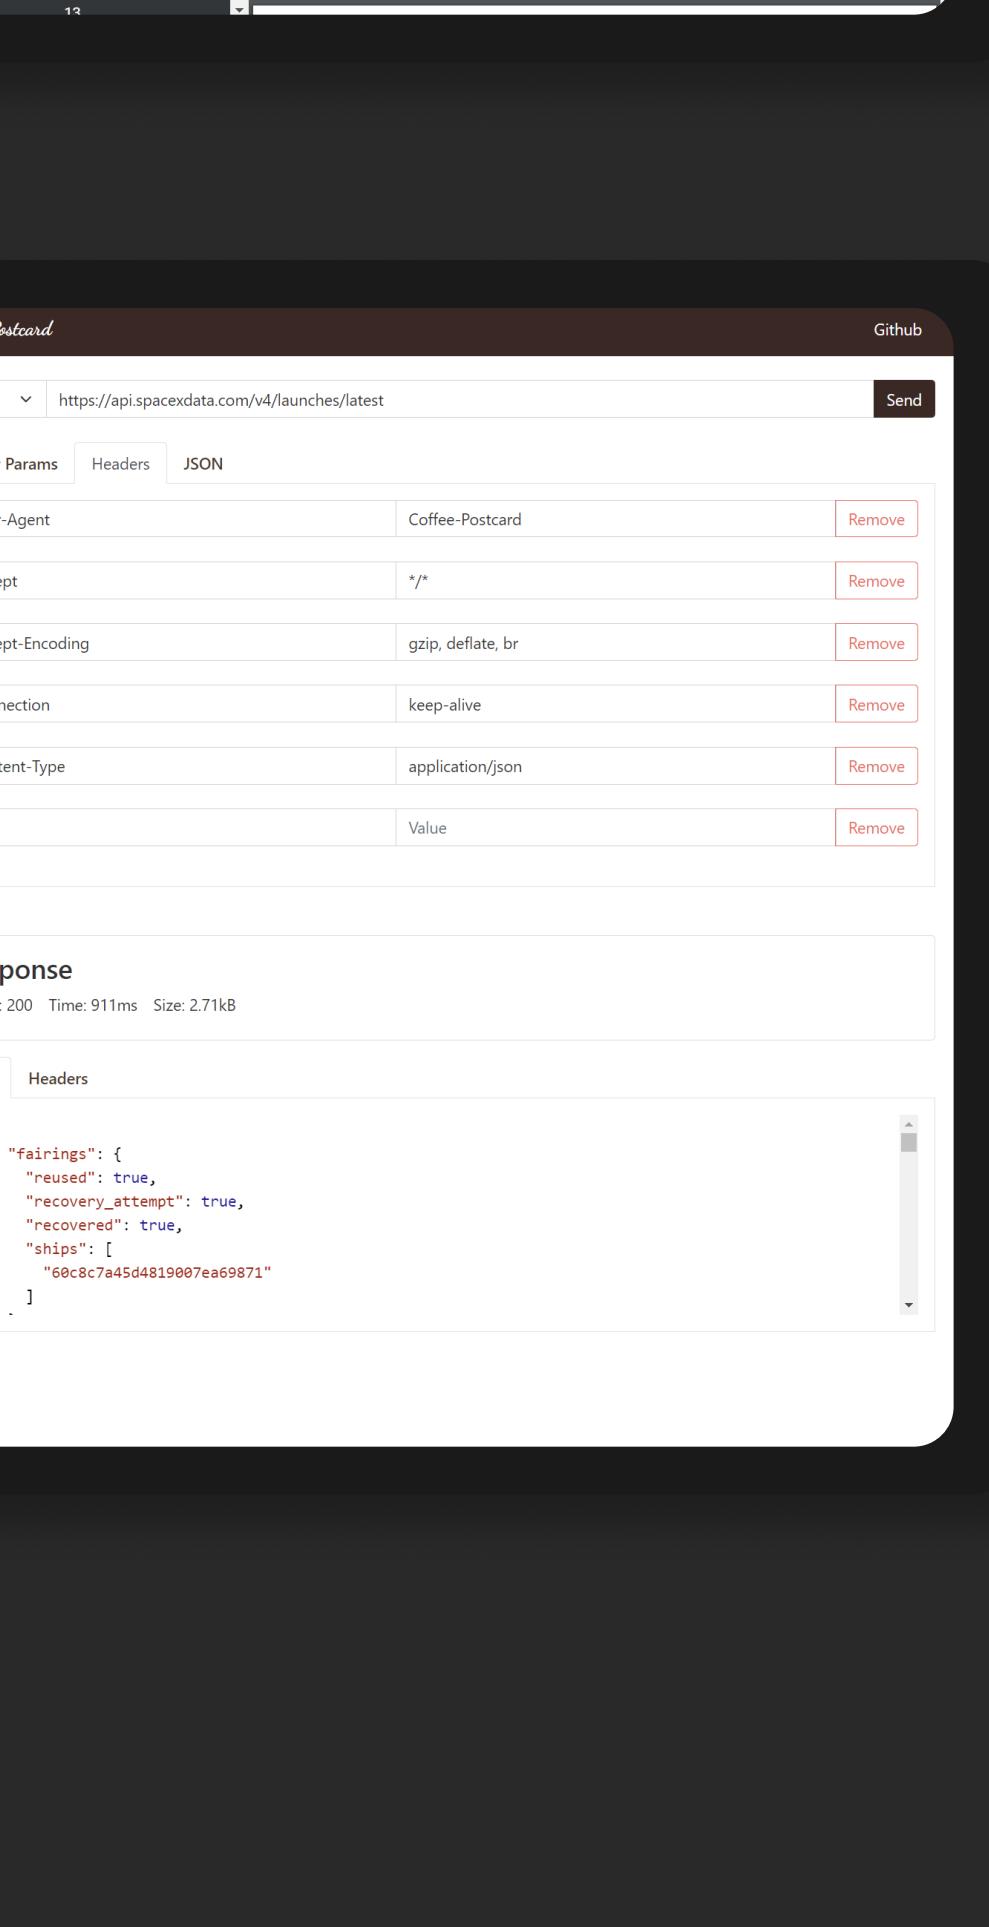

### Will AI destroy us?

Technology is a great feature and artificial intelligence evolves fast. I understand that GPT-3 could make a bit of fear because it seems so humane but I don't think any AI could ever be smarter than the whole humanity... and human humor is very complex btw...

## What is the sense of life?

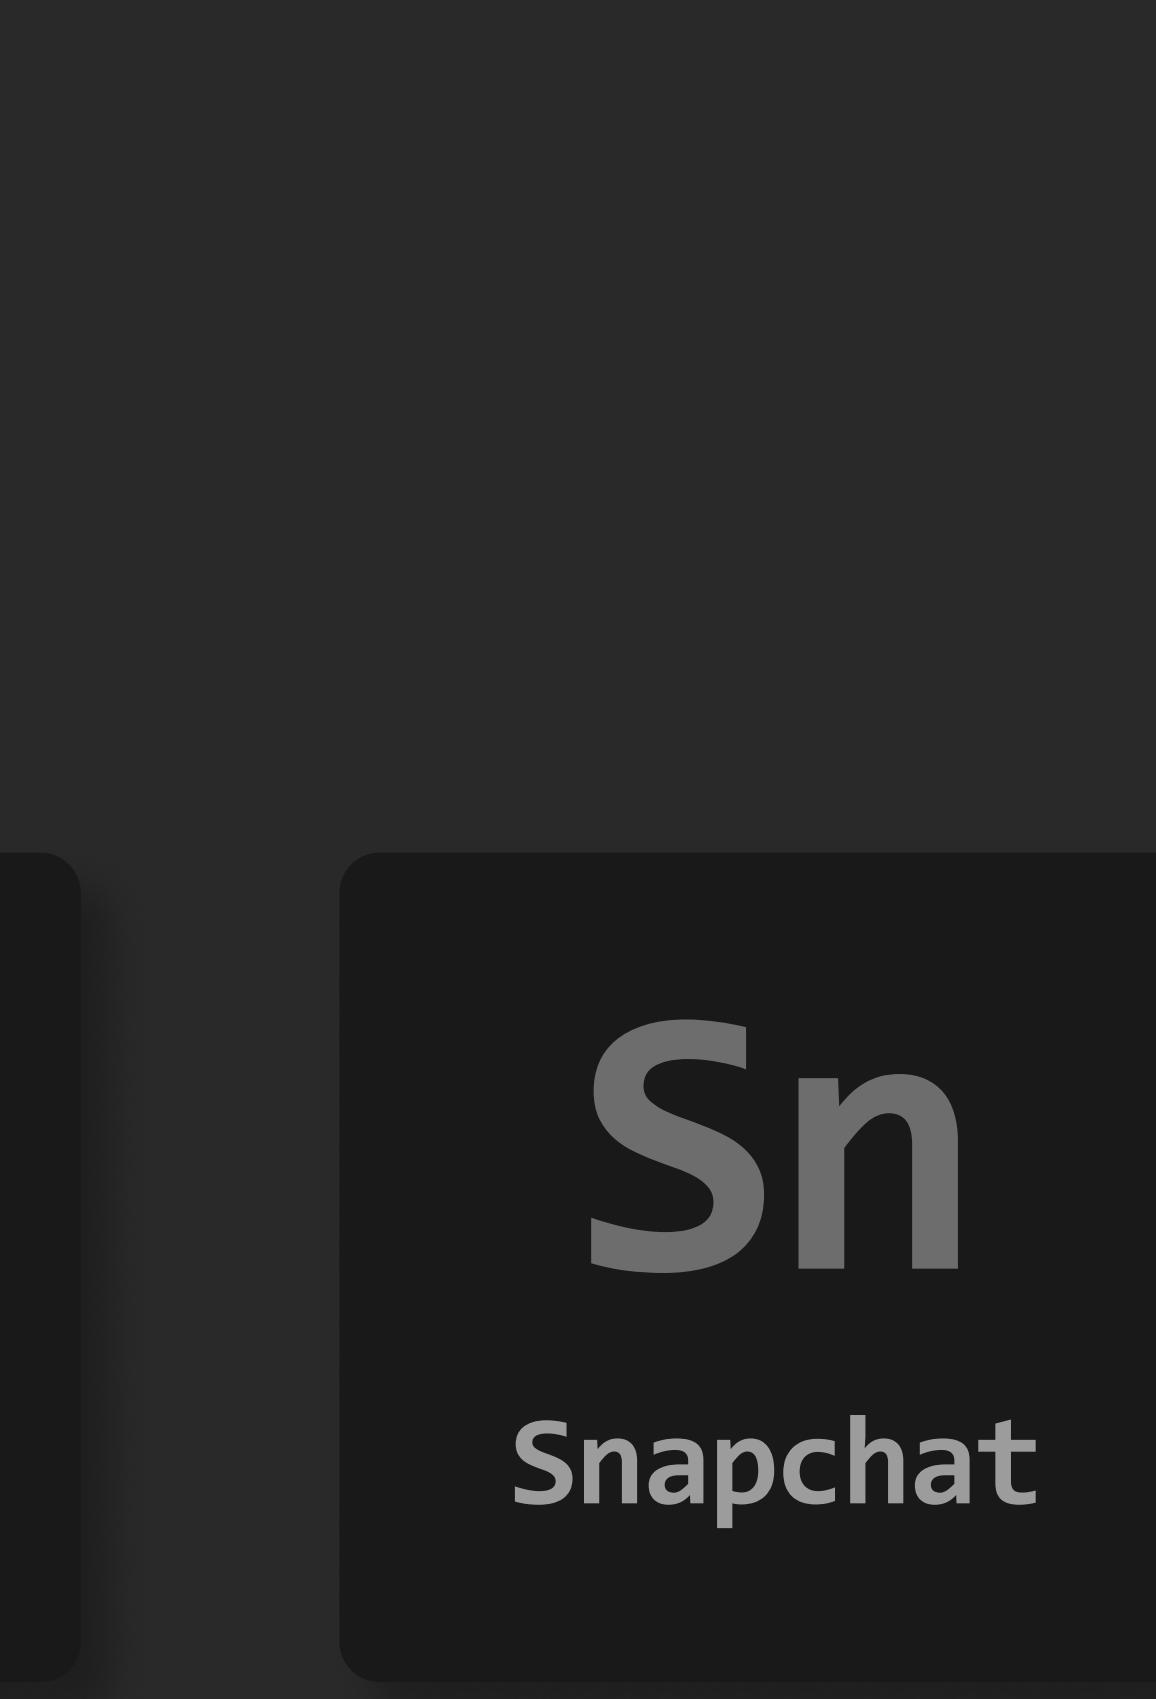

42!  
In my opinion the sense of life for a human is to be happy.  
Of course you cannot be happy every millisecond of your life. That's not what I mean. But you should do everything you can to when it all comes to an end be satisfied with what you had achieved in your life.
